

# OPENFINANCE BUSINESS PROCESS HYPERAUTOMATION PROGRAM

## KEY OBJECTIVES

Automate the business process in a financial organization in a decoupled and standardized way applying the OpenFinance concept of business process choreography.

Prepare the business process to work in any OpenBanking / OpenFinance and NeoBanking scenario.

Modernize the current monolithic architecture in the IT applications that supports the "core" processes in a decoupled "composable" architecture.

## ABOUT THE PROGRAM

With this program you can automate business process ( mainly customer/product onboarding and postsale ) in a way that the products can fit any OpenFinance and NeoBanking strategy also modernizing them in a "Composable Architecture".
