

The most secure way to evolve your current legacy architecture to achieve the future OpenBanking and OpenFinance Challenges.

CORELESS BANKING MODERNIZATION PROGRAM

OBJECTIVES

The Coreless Banking Modernization Program will transform the current monolithic-legacy CORE System into a "Composable" 4th Generation Core Banking System without changing the core function of the current application.

This modernization program will support the institution evolution for OpenBanking / OpenFinance and NeoBanking business scenarios.

PROGRESSIVE MODERNIZATION

You can modernize your current CORE System in a progressive way, obtaining results in parallel to the CORE transformation.

COMPOSABLE ARCHITECTURE

You are creating a Decoupled Architecture that supports the modernization based on 4th generation concepts.

OPEN FINANCE EVOLUTION

You are evolving your CORE to aboard the challenges related to OpenBanking, OpenFinance and NeoBanking scenarios.
