

OpenFinance API Marketplace Program

Be prepared for the
OpenFinance / NeoBanking
Revolution

OpenBanking OpenFinance NeoBanking

KEY OBJECTIVES

Applying Standards

Create the API capabilities combining key standards like BIAN / ISO20022 / OpenBanking UK and API Led Connectivity

Decoupling Architecture

Create a bidimensional abstraction between data consumers and applications combining semantics and composable architecture methodology

Design and Runtime Governance

Implement the process and rules required to control and secure the API Architecture in the organization

Join the Future of Banking Today

Say goodbye to customized non-reusable integrations and start integrating with new OpenFinance Echosystem.

Evolve your

Integration Architecture

ABOUT THE PROGRAM

With this program you are aligning the IT Integration Strategy with global standards and methodologies applied at worldwide level, supported by major organizations like BIAN, OpenGroup and OpenBanking UK.

Also you are preparing your organization for OpenBanking / OpenFinance and NeoBanking challenges with a cost-effective integration strategy.

In collaboration with :

OPEN BANKING

THE *Open* GROUP
