PLAY DIGITAL Consulting

BIAN & AGILE2.0

Implementation Program

ABOUT

This program is created in order to transform the current IT Development Lifecycle joining the concepts of standardization (BIAN), decoupling (Open Group) and Progressive Development (Agile 2.0) generating real efficiency in the IT Operative Model.

1+ Decoupling

Apply the decoupling techniques and concepts in Agile Cells and Squads transforming your IT capabilities in a Coreless Banking Factory.

2+ Standardization

Secure the semantic standards in your IT Development capabilities preventing the BIAN / ISO20022 / FDX distorsion.

Powered by

THE Open GROUP

BIAN
Banking Industry
Architecture Network

3+ Agile 2.0

Implement Agile in a way where decoupling is a key driver and Dependency Diagrams facilitates the Agile Real Adoption.
